Read the passage below and answer the questions (from 32 to 36) that follow, choosing the correct alternatives given :

It may surprise many people that a thing like worry can be a killer. This has been proved by all medical researches that worry is a major cause of heart ailments, blood pressure, rheumatism, ulcers, skin problems, asthma and many other psychosomatic diseases. Dr. Alexis Carrel, a Nobel Prize winner in medicine, said, "Businessmen who do not know how to fight worry die young". But so do a lot of home-makers, lawyers and ordinary clerks who do not control this evil.

There are several causes of worries. The fast-paced and complicated life style that most people are leading today contributes largely to our anxieties. Shortages, fears, competitions, dissatisfaction – everything adds to the burden on our minds. Some of these factors may be uncontrolled but most of them are within our control.

According to Plato, the Greek Philosopher, "The greatest mistake physicians make is that they attempt to cure the body without attempting to cure the mind. Mind and body are one and should not be treated separately".

Emotions like futility, frustration, anxiety, worry, fear, despair, defeat, etc. are negative emotions. These affect much our mental as well as physical health. Worry specially creates a high degree of tension. Many a time we find ourselves unable to concentrate due to worries. Only a cool and worriless mind functions normally and to its capacity.
