Section Descriptive

Q.1 Write an essay of 150 words on any one of the following topics:

- a. Global Warming
- b. The Importance of Education
- c. The Role of a Soldier in the Defence of India
- d. The Joys of Summer Vacation

Case Sensitivity: No

Answer :

Possible Answer NA

Given Topic- Global Warming The harmful rays from the Sun causes skin cancer and various harmful side effects. The Ozone layer above the atmosphere protects us against these harmful radiations. But, due to overexploitation of resources, excessive emissions of harmful gases from various vehicles and all the man made changes happening in the nature does not allow the sun rays,once trapped inside the earth's surface, to go back thus, making the earth's atmosphere so hot, which is termed as Global Warming. This issue leads to melting of Glaciers and increase in the temperature of atmosphere. Today, is the need of the hour, that we as individual citizens should take a step towards prevention of Global Warming. Various harmful gases like Nitrogen Oxide, Sulphur Dioxide, Carbon Dioxide, Methane etc, are the roots that cause Gobal Warming. A man in present century, cannot live without air conditioners, big polluting vehicles and disturbing the natural cycle of nature, which all leads to Global Warming. To solve this global issue, government has taken many steps to reduce Global Warming like G-7 summit of which India is a part, has planned to reduce the emissions of such gases by 2025. Also, the concept of "ODD-EVEN RULE" of vehicles is there in order to reduce the emissions of harmful gases. Nowadays, air conditioners with advanced techonolgy are available in order to reduce Global Warming. At an individual level, we should not waste the resources unnecessary and follow the concept of sustainable development. These small steps would one day lead to a bigger change, hence, making India free from Global Warming.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given 3040 Lic Colony Chandigarh 3 October 2022 Dear Sushmita I hope you are in pink of

Answer : your health. I am afraid to know that you have not fared well in your recent examinations. I am wirting this letter to discuss some pieces of advice with you. Examinations are a part of life and failures are the pillars of success. You should not take the marks of examination to your heart, instead you should work more hard and focus more on your weaknesses. The school examinations are not your real life tests. Some of the points for imporvements that I would like to share with you are that the subject, you find difficult, practice it daily and revise thoroughly before your exam. You should try to solve previous year question papers too, in order to get an idea of the pattern and how questions come in exam. You should also, discuss your doubts with your teacher on a regular basis and don't feel shy while clearing your concepts and doubts. You may also take the help of youtube videos for better understanding of the topics. Make a habit of writing notes on a regular basis of whatever you study, this will not make you panic at the end moment while revising. Give my regards to uncle and aunt. I would be waiting for your response. Your Loving Indejot

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

Science is helping man to produce much more food from the earth. By this, it is helping to get rid of famine and to prevent sickness caused by not having enough food to eat. It has also made possible the sending of quick relief to places where there is shortage of food and medicines with the help of motor lorries, railway trains, ships and airplanes. That is also very good, and many lives are saved in such way. There are also many discoveries of science which have definitely brought unhappiness into the world. But that is not because the discoveries are bad, but because men are using them badly. For example, consider the discovery of gun powder and of other explosives each more powerful than the previous one discovered. In ancient times men could wound and kill each other only if they were near enough to strike each other with stones, arrows, spears or swords. Even in battles the arms on both sides usually consisted of a few thousand men so the number wounded and killed was not very large. In most wars the peasants went on cultivating their fields peacefully even when the armies were fighting a few kilometers away. But the invention of firearms and high explosives caused a great change. A modern machine-gun or quick firing gun, worked by a single man, can wound, and kill hundreds of people in a few minutes. One modern bomb can kill hundreds of thousands of people immediately if it is dropped on a big city. The scientists who invented these terrible weapons are not wicked men who enjoy killing. They are people with kind hearts, but they are cleverer, and they earn their living by discovering new things. It is the leaders of the various nations who employ them to make discoveries which can be used to kill the people of other nations. The same discoveries could be used for useful purposes if the leaders did not allow them to be used for killing. Explosives are not harmful they are used for such purposes as helping to get coal, metals and other materials out of the earth. The same motors and airplanes which are used to carry guns and drop bombs, can be very useful for good purposes. So, we see that it is not the discoveries and inventions than are bad but the ways in which men use them.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given Title- Inventions or Discoveries are a Boon or Ban ! The fastest growing technology and advancements in science have led to many discoveries and inventions which either can be useful or destructive for the economy. The major problems of India like hunger, poverty are being removed with new advancement in motor lorries, railways and ships. But, man being a social animal, his greed comes in between before achieving his goals. Earlier, when there was no such inventions of science, people used to live a simple life, leading to less loss of human life and less hatred. Now a days, a single bomb can cause massive destruction all because of new ways of inventing a single thing. Thus, it is in the hands of the man, whether to use these technologies in an effective or destructive way. Like a coin having two sides, similarly, the discoveries and inventions have both effects.

Answer :

Possible Answer: NA

Given Today, computer has become a part and parcel of human's life. Every field of work
Answer : requires the need of computer. Today's era is the era of computers and advanced technology. In 21st century, science has advanced so much that it has led to a lot of benefits for the mankind. A computer is designed in a such a way, that it can perform various mathematical functions, replace human memory, increase the speed of the work but still the question arises, can computer replace a human completely? The first computer was invented in 1956, that was designed in a such way that it would make the work of a man easier. But, today's generation is all about new models and features of computers which is becoming a necessity and not a need for today's man.
