Section : Module I Mathematical Abilities

**Q.1** एक दूध विक्रेता के पास 75 लीटर गाय का दूध, 45 लीटर टॉड दूध और 30 लीटर फुल क्रीम दूध है। इन्हें अलग-अलग ट्रे में इस प्रकार रखना चाहिए कि प्रत्येक ट्रे में समान मात्रा में दूध हो और एक ट्रे में दो प्रकार का दूध नहीं मिलाना चाहिए। सारा दूध रखने के लिए कम से कम कितनी ट्रे की आवश्यकता होगी?

**Ans** ☒ 1. 15

☒ 2. 20

☒ 3. 10

☒ 4. 25

Question ID : 630680769069

Option 1 ID : 6306803014292

Option 2 ID : 6306803014294

Option 3 ID : 6306803014293

Option 4 ID : 6306803014295

Status : Answered

Chosen Option : 3

**Q.2** समान विकर्णों और समान विपरीत भुजाओं वाला चतुर्भुज सदैव एक \_\_\_\_\_ होता है।

**Ans** ☒ 1. पतंगाकार

☒ 2. आयत

☒ 3. समलंब

☒ 4. समचतुर्भुज

Question ID : 630680297308

Option 1 ID : 6306801156699

Option 2 ID : 6306801156700

Option 3 ID : 6306801156702

Option 4 ID : 6306801156701

Status : Answered

Chosen Option : 2

Q.15

दो कथन, I और II दिए गए हैं। ये कथन स्वतंत्र कारण हो सकते हैं या स्वतंत्र कारणों के प्रभाव या उभयनिष्ठ कारण हो सकते हैं। एक कथन, दूसरे कथन का प्रभाव हो सकता है। दोनों कथनों को पढ़िए और सही विकल्प का चयन कीजिए।

I. बालासोर में कल के लिए निर्धारित की गई सभी स्नातक परीक्षाएँ विश्वविद्यालय द्वारा स्थगित कर दी गई हैं। नई तारीखों की घोषणा अगले सप्ताह के शुरुआत में की जाएगी।

II. बालासोर में कल तेज हवाओं और अत्यधिक भारी बारिश की संभावना है क्योंकि सायक्लोन के दोपहर 3 बजे तक धरती से टकराने की संभावना है।

Ans

✗ 1. I और II दोनों स्वतंत्र कारणों के प्रभाव हैं

✗ 2. I कारण है और II इसका संभावित प्रभाव है

✓ 3. II कारण है और I इसका संभावित प्रभाव है

✗ 4. I और II दोनों स्वतंत्र कारण हैं

While the first and the last sentences (S1 and S6) are in the correct order, the sentences in between are jumbled up. Arrange the sentences in the correct order to form a meaningful and coherent paragraph.<br><br>S1. CV Raman's story begins in a village near Tiruchirapalli (known in his days as Trichinopoly) in southern India.<br>P. When he was four years old, Raman's family moved to Vishakapatnam.<br>Q. He was born on 8 November 1888, the second child of R Chandrashekara Iyer and Parvati Ammal.<br>R. Chandrasekara Iyer was an athletic man and he took active interest in sports.<br>S. His father took up a job there, as a lecturer in Mrs. AV Narsimha Rao College, where he taught physics, mathematics and physical geography.<br>S6. His young son Raman was not physically very strong, but was very intelligent and he preferred to read books and work at his studies. |

|                 | <p><b>Comprehension:</b></p> <p>In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.</p> <p>During active sleep, the body is still, (1)_____ the brain is active. The eyes dart back and forth behind closed lids, blood pressure (2)_____ and the breathing pattern speeds up. An EEG of someone during rapid eye movement sleep looks almost the same as the EEG of a person in the waking state, although one is still asleep and the body is still immobile. Rapid eye movement sleep plays a vital role in harmonising the experiences we have in the world outside. An EEG of someone during rapid eye movement sleep looks almost the same as the EEG of a person in the (3)_____ state, although one is still asleep and the body is still (4)_____. Rapid eye movement during sleep plays a vital role in harmonising the experiences we have in the world outside.</p> |               |              |               |               |               |               |               |               |               |               |          |          |                 |   |

| Chosen Option : | 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |               |              |               |               |               |               |               |               |               |               |          |          |                 |   |

Comprehension:

In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

During active sleep, the body is still, (1)\_\_\_\_\_ the brain is active. The eyes dart back and forth behind closed lids, blood pressure (2)\_\_\_\_\_ and the breathing pattern speeds up. An EEG of someone during rapid eye movement sleep looks almost the same as the EEG of a person in the waking state, although one is still asleep and the body is still immobile. Rapid eye movement sleep plays a vital role in harmonising the experiences we have in the world outside. An EEG of someone during rapid eye movement sleep looks almost the same as the EEG of a person in the (3)\_\_\_\_\_ state, although one is still asleep and the body is still (4)\_\_\_\_\_. Rapid eye movement during sleep plays a vital role in harmonising the experiences we have in the world outside.

SubQuestion No : 32

Q.32

Select the most appropriate option to fill in blank number 4.

Ans

✗ 1. performing

✗ 2. active

✗ 3. conscious

✓ 4. immobile

Question ID : 630680396471

Option 1 ID : 6306801545986

Option 2 ID : 6306801545983

Option 3 ID : 6306801545985

Option 4 ID : 6306801545984

Status : Answered

Chosen Option : 2

| <p>Read the given passage and answer the question that follows.</p> <p>As a result of increasing population and expansion of residential areas, forest lands are being encroached. This is not all; even the wildlife is under extreme threat. As our fauna is facing a dearth of adequate shelter in forests, they are heading towards towns and hence get killed by hunters. Consequently, many animal species have either become extinct or are on the verge of extinction. The Black Buck is almost endangered and found only in two countries, Nepal and India. In India, this antelope is found in many national parks like Guindy National Park, Point Calimere and Vellandu sanctuaries of Tamil Nadu, Rollapadu of Andhra Pradesh, few parts of Rajasthan and Haryana. As far as their habitat is concerned, they live in open grasslands, dry areas or thinly populated areas and near water resources. They live in the desert areas of Rajasthan and coastal areas because they cannot sustain cold climate. They are the fastest running animals on this planet. Further, this animal is active during the day, but slows down in its activities after mid-day. They are social beings. Hence, they move with their herds, which can vary from 3 to 23 mates. They cohabit twice in a year and give birth twice in a year.</p> <p>Prior to independence, this antelope was extensively hunted which affected their population so much that this species has reached the stage of extinction in many parts of the country. Poachers kill them mainly for material gain. Its skin has an enormous value in the market. In order to protect this species, the IUCN has declared this species nearly threatened. Hence, under Schedule I of the Wildlife Protection Act of 1972, numerous stern measures have been taken. To specify a few, Kaimur Wildlife Sanctuary (Bihar), Gir Forest National Park, Velavadar Wildlife Sanctuary (Gujarat), National Chambal Sanctuary, etc. Despite these acts, hunting is adversely affecting our wildlife. There are some solutions to this problem but the best one is to boycott the products made from endangered species at an international level. This seems to be effective but will it prevent animal hunting? That's a question.</p> |                                                                                                                                  |
| SubQuestion No : 33                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                  |

| <p>Read the given passage and answer the question that follows.</p> <p>As a result of increasing population and expansion of residential areas, forest lands are being encroached. This is not all; even the wildlife is under extreme threat. As our fauna is facing a dearth of adequate shelter in forests, they are heading towards towns and hence get killed by hunters. Consequently, many animal species have either become extinct or are on the verge of extinction. The Black Buck is almost endangered and found only in two countries, Nepal and India. In India, this antelope is found in many national parks like Guindy National Park, Point Calimere and Vellandu sanctuaries of Tamil Nadu, Rollapadu of Andhra Pradesh, few parts of Rajasthan and Haryana. As far as their habitat is concerned, they live in open grasslands, dry areas or thinly populated areas and near water resources. They live in the desert areas of Rajasthan and coastal areas because they cannot sustain cold climate. They are the fastest running animals on this planet. Further, this animal is active during the day, but slows down in its activities after mid-day. They are social beings. Hence, they move with their herds, which can vary from 3 to 23 mates. They cohabit twice in a year and give birth twice in a year.</p> <p>Prior to independence, this antelope was extensively hunted which affected their population so much that this species has reached the stage of extinction in many parts of the country. Poachers kill them mainly for material gain. Its skin has an enormous value in the market. In order to protect this species, the IUCN has declared this species nearly threatened. Hence, under Schedule I of the Wildlife Protection Act of 1972, numerous stern measures have been taken. To specify a few, Kaimur Wildlife Sanctuary (Bihar), Gir Forest National Park, Velavadar Wildlife Sanctuary (Gujarat), National Chambal Sanctuary, etc. Despite these acts, hunting is adversely affecting our wildlife. There are some solutions to this problem but the best one is to boycott the products made from endangered species at an international level. This seems to be effective but will it prevent animal hunting? That's a question.</p> |                                                                                                                            |
| SubQuestion No : 34                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                            |

| <p>Read the given passage and answer the question that follows.</p> <p>As a result of increasing population and expansion of residential areas, forest lands are being encroached. This is not all; even the wildlife is under extreme threat. As our fauna is facing a dearth of adequate shelter in forests, they are heading towards towns and hence get killed by hunters. Consequently, many animal species have either become extinct or are on the verge of extinction. The Black Buck is almost endangered and found only in two countries, Nepal and India. In India, this antelope is found in many national parks like Guindy National Park, Point Calimere and Vellandu sanctuaries of Tamil Nadu, Rollapadu of Andhra Pradesh, few parts of Rajasthan and Haryana. As far as their habitat is concerned, they live in open grasslands, dry areas or thinly populated areas and near water resources. They live in the desert areas of Rajasthan and coastal areas because they cannot sustain cold climate. They are the fastest running animals on this planet. Further, this animal is active during the day, but slows down in its activities after mid-day. They are social beings. Hence, they move with their herds, which can vary from 3 to 23 mates. They cohabit twice in a year and give birth twice in a year.</p> <p>Prior to independence, this antelope was extensively hunted which affected their population so much that this species has reached the stage of extinction in many parts of the country. Poachers kill them mainly for material gain. Its skin has an enormous value in the market. In order to protect this species, the IUCN has declared this species nearly threatened. Hence, under Schedule I of the Wildlife Protection Act of 1972, numerous stern measures have been taken. To specify a few, Kaimur Wildlife Sanctuary (Bihar), Gir Forest National Park, Velavadar Wildlife Sanctuary (Gujarat), National Chambal Sanctuary, etc. Despite these acts, hunting is adversely affecting our wildlife. There are some solutions to this problem but the best one is to boycott the products made from endangered species at an international level. This seems to be effective but will it prevent animal hunting? That's a question.</p> |                                                                                                                                                                                                                                         |

| <p>Read the given passage and answer the question that follows.</p> <p>As a result of increasing population and expansion of residential areas, forest lands are being encroached. This is not all; even the wildlife is under extreme threat. As our fauna is facing a dearth of adequate shelter in forests, they are heading towards towns and hence get killed by hunters. Consequently, many animal species have either become extinct or are on the verge of extinction. The Black Buck is almost endangered and found only in two countries, Nepal and India. In India, this antelope is found in many national parks like Guindy National Park, Point Calimere and Vellandu sanctuaries of Tamil Nadu, Rollapadu of Andhra Pradesh, few parts of Rajasthan and Haryana. As far as their habitat is concerned, they live in open grasslands, dry areas or thinly populated areas and near water resources. They live in the desert areas of Rajasthan and coastal areas because they cannot sustain cold climate. They are the fastest running animals on this planet. Further, this animal is active during the day, but slows down in its activities after mid-day. They are social beings. Hence, they move with their herds, which can vary from 3 to 23 mates. They cohabit twice in a year and give birth twice in a year.</p> <p>Prior to independence, this antelope was extensively hunted which affected their population so much that this species has reached the stage of extinction in many parts of the country. Poachers kill them mainly for material gain. Its skin has an enormous value in the market. In order to protect this species, the IUCN has declared this species nearly threatened. Hence, under Schedule I of the Wildlife Protection Act of 1972, numerous stern measures have been taken. To specify a few, Kaimur Wildlife Sanctuary (Bihar), Gir Forest National Park, Velavadar Wildlife Sanctuary (Gujarat), National Chambal Sanctuary, etc. Despite these acts, hunting is adversely affecting our wildlife. There are some solutions to this problem but the best one is to boycott the products made from endangered species at an international level. This seems to be effective but will it prevent animal hunting? That's a question.</p> |                                                                                                                                                                                                           |

Comprehension:

Read the given passage and answer the question that follows.

Lena was an avid explorer. She had a deep fascination for the mysteries hidden within the dense forests. One day, while wandering through a secluded forest, she stumbled upon an ancient-looking map half-buried in the undergrowth. The map depicted a trail that led to a legendary waterfall rumoured to possess magical properties. Driven by her curiosity, Lena decided to follow the trail.

As she walked deeper into the forest, the atmosphere grew more enchanting. Sunlight filtered through the thick canopy, casting dappled patterns on the ground. The sound of rustling leaves and distant bird calls created a symphony of nature around her. Guided by the map's markings, Lena navigated through challenging terrains and crossed a narrow rope bridge suspended over a crystal-clear stream.

Finally, after hours of journeying, Lena arrived at the foot of the legendary waterfall. Its cascading waters sparkled like diamonds in the sunlight, and a gentle mist enveloped the surroundings. Lena felt a sense of wonder and tranquillity as she dipped her hand in the cool waters, as if the legends were coming alive. She sat by the waterfall, captivated by its beauty, pondering the ancient stories that had led her here.

SubQuestion No : 37

Q.37

Select the most appropriate ANTONYM of the underlined word in the given sentence.  
What surrounded Lena as she journeyed through the forest?

Ans

✗ 1. Bolt

✗ 2. Created

✓ 3. Freed

✗ 4. Girded

The map depicted a trail that led to a legendary waterfall rumoured to possess magical properties. Driven by her curiosity, Lena decided to follow the trail.

As she walked deeper into the forest, the atmosphere grew more enchanting. Sunlight filtered through the thick canopy, casting dappled patterns on the ground. The sound of rustling leaves and distant bird calls created a symphony of nature around her. Guided by the map's markings, Lena navigated through challenging terrains and crossed a narrow rope bridge suspended over a crystal-clear stream.

Finally, after hours of journeying, Lena arrived at the foot of the legendary waterfall. Its cascading waters sparkled like diamonds in the sunlight, and a gentle mist enveloped the surroundings. Lena felt a sense of wonder and tranquillity as she dipped her hand in the cool waters, as if the legends were coming alive. She sat by the waterfall, captivated by its beauty, pondering the ancient stories that had led her here.

SubQuestion No : 38

Q.38

What intrigued Lena's curiosity in the forest?

Ans

✖

1. She discovered an old book.

✖

2. She found a hidden cave.

✔

3. She stumbled upon an ancient map.

✖

4. She heard whispers in the wind.

Comprehension:

Read the given passage and answer the question that follows.

Lena was an avid explorer. She had a deep fascination for the mysteries hidden within the dense forests. One day, while wandering through a secluded forest, she stumbled upon an ancient-looking map half-buried in the undergrowth. The map depicted a trail that led to a legendary waterfall rumoured to possess magical properties. Driven by her curiosity, Lena decided to follow the trail.

As she walked deeper into the forest, the atmosphere grew more enchanting. Sunlight filtered through the thick canopy, casting dappled patterns on the ground. The sound of rustling leaves and distant bird calls created a symphony of nature around her. Guided by the map's markings, Lena navigated through challenging terrains and crossed a narrow rope bridge suspended over a crystal-clear stream.

Finally, after hours of journeying, Lena arrived at the foot of the legendary waterfall. Its cascading waters sparkled like diamonds in the sunlight, and a gentle mist enveloped the surroundings. Lena felt a sense of wonder and tranquillity as she dipped her hand in the cool waters, as if the legends were coming alive. She sat by the waterfall, captivated by its beauty, pondering the ancient stories that had led her here.
