

Q.1 Leaners feel engaged and actively involved in process of learning when:

- A. their prior knowledge is discarded and negated.
- B. activities are related to their context.
- C. focus of learning is repetition and memorization.
- D. socio-emotional needs of leaners are ignored.

Answer: B

Sol: Activities related to learners' context make learning more meaningful and relevant, which increases engagement and active involvement. When students can connect new information to their own experiences and knowledge, they are more likely to be interested and motivated. Discarding prior knowledge, focusing on repetition and memorization, or ignoring socio-emotional needs does not contribute to meaningful engagement.

Q.2 Assertion A: Teachers should provide emotional support to children in the classroom to ensure effective learning.

Reasons R: Emotions and cognition are related to each other in complex ways.

Choose the correct option.

- A. Both A and R are false.
- B. Both A and
