Read the passage and answer the questions given below it.

Leonardo da Vinci, which in Italian means “Leonardo from Vinci” was born on April 15, 1452, at Anchiano, near Vinci, Republic of Florence in Italy and died on May 2, 1519, at Cloux [now Clos-Lucé], in France. He was an Italian painter, draftsman, sculptor, architect, and engineer whose genius, perhaps more than that of any other figure, epitomized the Renaissance humanist ideal. His Last Supper (1495–98) and Mona Lisa (c. 1503–19) are among the most widely popular and influential paintings of the Renaissance. His notebooks reveal a spirit of scientific inquiry and a mechanical inventiveness that were centuries ahead of their time.

The unique fame that Leonardo enjoyed in his lifetime and that, filtered by historical criticism, has remained undimmed to the present day rests largely on his unlimited desire for knowledge, which guided all his thinking and behaviour. An artist by disposition and endowment, he considered his eyes to be his main avenue to knowledge; to Leonardo, sight was man’s highest sense because it alone conveyed the facts of experience immediately, correctly, and with certainty. Hence, every phenomenon perceived became an object of knowledge, and ‘knowing how to see’ became the great theme of his studies. He applied his creativity to every realm in which graphic representation is used: he was a painter, sculptor, architect, and engineer. But he went even beyond that. He used his superb intellect, unusual powers of observation, and mastery of the art of drawing to study nature itself, a line of inquiry that allowed his dual pursuits of art and science to flourish.

Try clapping inside the Golconda Fort and discover what happens. Snap your fingers and you shall be heard a distance away. The first thing anyone entering the Golconda Fort in Hyderabad does is clap. No, they are not seeking the help of the king, they are testing the acoustics of the Golconda Fort from where the Qutb Shahi kings ruled for nearly 200 years. Clap inside the grand portico under the dome and it can be heard in the Bala Hisar pavilion more than a kilometre away, on top of a mountain. Even today, as buses and vehicles roar around the inner fort, you can hear people clapping in the portico. This story is not about the acoustics of the Golconda fort but about exchange of technology much before broadband, Internet and computers made this possible with a click.

The fort that used to be a rock and mud structure was completed in 1582 under the supervision of architects, most of whom hailed from Isfahan in Iran. Mir Momin laid out the plan for Hyderabad with Charminar at the centrepiece. As you clap, try noticing the series of arches with diminishing sizes. The arches are one of the secrets of the stunning acoustics that could help an army commander listen to what the sentry was doing. A similar acoustic device can be found in Isfahan where it was created for religious purposes.

The Shahi Mosque (now called Imam Mosque) has twin echo chambers that ensure that the Moulvi in the tower can be sure of being heard by all the congregation when he gives the sermon. In the middle of the great prayer hall there are few black paving stones. Stamp on them and it creates seven clear echoes.

These ancient architects understood both the facets of sound echo as well as amplification that form part of sound physics. They used material known for their sound reflection properties like clay pots and pans and blended them into the building material. The next thing they did was to use compression and amplification. The architects did not bring maps. They just understood sound. The clapping portico in Golconda Fort has on one side a series of arches, each smaller than the preceding one. So, a sound wave generated under the dome of the portico would get compressed and then bounce back amplified enough to reach a distance of more than a kilometre.

निम्नलिखित गद्यांश को पढ़कर उसके सही उत्तर दीजिये।

दार्शनिक अरस्तू ने कहा है - “प्रत्येक व्यक्ति को उचित समय पर, उचित व्यक्ति से, उचित मात्रा में, उचित उद्देश्य के लिए, उचित ढंग से व्यवहार करना चाहिए। “वास्तव में प्रत्येक प्राणी का संबंध एक-एक क्षण है, किन्तु व्यक्ति उसका महत्त्व नहीं समझता। अधिकतर व्यक्ति सोचते हैं कि कोई अच्छा समय आएगा तो काम करेंगे। इस दुविधा और उधेड़बुन में वे जीवन के अनेक अमूल्य क्षणों को खो देते हैं। किसी व्यक्ति को बिना हाथ-पाँव हिलाए संसार की बहुत बड़ी संपत्ति छप्पर फाड़कर कभी नहीं मिलती। समय उन्हीं के रथ के घोड़ों को हाँकता है जो भाग्य के भरोसे बैठना पौरुष का अपमान समझते हैं। जो व्यक्ति श्रम और समय का पारखी होता है। लक्ष्मी भी उसी का वरण करती है। समय की कीमत न पहचानने वाले समय बीत जाने पर सर धुनते रह जाते हैं। समय निरंतर गतिमान है। इसलिए हमें समय का मूल्य समझना चाहिए। साथ ही समयानुसार काम भी करना चाहिए। सफल जीवन की यही कुंजी है।

निम्नलिखित गद्यांश को पढ़कर उसके सही उत्तर दीजिये।

पिता के ठीक विपरीत थी हमारी बेपढ़ी-लिखी माँ। धरती से कुछ ज़्यादा ही धैर्य और सहनशक्ति थी शायद उनमें। पिता जी की हर ज़्यादाती को अपना प्राप्य और बच्चों की हर उचित-अनुचित फरमाइश और ज़िद को अपना फ़र्ज़ समझकर सहज भाव से स्वीकार करती थीं। वे i उन्होंने ज़िन्दगी भर अपने लिए कुछ माँगा नहीं, चाहा नहीं - केवल दिया ही दिया। हम भाई-बहनों का सारा लगाव (शायद सहानुभूति से उपजा) माँ के साथ था लेकिन निहायत असहाय मजबूरी में लिपटा उनका यह त्याग कभी मेरा आदर्श नहीं बन सका - न उनका त्याग न उनकी सहिष्णुता।
